## Announcing the Accelerator Program for all Grade 11 learners in Gauteng.

The Accelerator program has the following goals:

You get access to our study skills workshops so that you can get better marks in school

You can attend our weekend schools where we help you to get better marks in Accounting, Math Literacy and Basic English

After you completed the courses in the Accelerator program, you have the option to write your first college exam while you are still in school. Where else can you earn credits towards your first college qualification while still in school?

Here is what you can get in the Accelerator Program:

Study Skills Program
Accounting supplementary program – earn college credits if you do the exam
Math Lit supplementary program – earn college credits if you do the exam
Basic English supplementary program – earn college credits if you do the exam

**Learners who attend the Accelerator Program who enrol for at least one subject, get priority acceptance to our college after they leave school.**
